INCOME INEQUALITY : EUROPE VS. THE UNITED STATES, 1900-2010

The top decile income share was higher in Europe than in the U.S. in 1900-1910; it is a lot higher in the U.S. in 2000-2010. Sources and series: see piketty.pse.ens.fr/capital21c.

In 1971 US-president Richard Nixon cancelled the gold standard and by that the gold backing of all western currencies (start of "fiat-money"). From that point on almost all countries inflated their money supply and government debt rose continuously. These are the real reasons for the disparity of income and wealth – and not 'capitalism' by itself. Inflation is a 'tax' that hurts people with low income and low assets more than others.

AVERAGE WEALTH PER CAPITA

MEDIAN USD NET WORTH PER CAPITA AS OF 2019

The median value is the number that is in the middle, with the same amount of citizens below and above.

The average wealth – total wealth divided by total number of citizens – would be higher.
